Title: Agent Orange Registry Code Sheet, VA Form 10-9009.

OMB Control Number: 2900-0376.

Type of Review: Extension of a currently approved collection.

Abstract: VA in an on-going effort to maintain an Agent Orange Registry (AOR) developed a reporting format to facilitate the collection of information obtained from veterans during the Agent Orange registry examination process. VA is required to organize and update the information contained in AOR to be able to notify Vietnam era veterans who served in the Republic of Vietnam of

any increased health risks resulting from exposure to dioxin or other toxic agents. VA may also provide, upon request, a health examination, consultation, and counseling veterans who are eligible for listing or inclusion in any health-related registry administered by VA that is similar to the Persian Gulf War Veterans Health Registry. Registry examination is provided to veterans who served in Korea in 1968 or 1969, and/or any U.S. veteran who may have been exposed to dioxin, or other toxic substance in a herbicide or defoliant, during the conduct of, or as a result of, the testing, transporting, or spraying of herbicides, and who requests an Agent Orange Registry examination. VA will enter the information obtained from the veteran during the interview on VA Form 10-9009, Agent Orange Registry Code Sheet. The registry will provide a mechanism that will catalogue prominent symptoms, reproductive health, and diagnoses and to communicate with Agent Orange veterans. VA will inform the veterans on research findings or new compensation policies through periodic newsletters. The registry is not designed or intended to be a research tool and therefore the results cannot be generalized to represent all Agent Orange veterans.
