Rather than locating the barrier on top of the Asbury Diversion Dam, the barrier would be located approximately 500 feet downstream of the diversion dam. The fish barrier would be a reinforced concrete overflow weir structure approximately 10 feet tall and 45 feet wide, which would include: an upper barrier weir with a 2-foot long metal overhanging cap, a 14-foot-long elevated jump apron with a 4-foot over hang, a 20-foot-long smooth apron, and a lower 60-foot-long rough apron. The purpose of the barrier is to prevent steelhead migrations above the Asbury Dam to protect the Darrah Springs State Fish Hatchery from diseases carried by migrating fish. The licensee is also proposing to revise the project boundary to incorporate the barrier and an access road.

### Federal Energy Regulatory Commission

[Docket No. CP13-13-000]

#### Dominion Transmission, Inc.; Notice of Application

Take notice that on November 1, 2012, Dominion Transmission, Inc. (DTI), 120 Tredegar Street, Richmond, VA 23219, filed in the above referenced docket an abbreviated application

pursuant to section 7(c) of the Natural Gas Act (NGA) for authorization to construct, install, own, operate and maintain its Natrium to Market Project (Project) located in Greene and Westmoreland Counties, Pennsylvania. Specifically, DTI will provide 185,000 dekatherms per day (Dth/d) of firm transportation service from a receipt point located at an interconnect between DTI and the processing facilities of Dominion Natrium, LLC in Marshall County, West Virginia to an interconnect between DTI and Texas Eastern Transmission, LP in Greene County, Pennsylvania, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site web at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov) or call toll-free, (886) 208-3676 or TYY, (202) 502-8659.

Any questions concerning this application may be directed to Brad A. Knisley, Regulatory and Certificates Analyst III, Dominion Transmission, Inc., 701 East Cary Street, Richmond, VA 23219, telephone no. (804) 771-4412, facsimile no. (804) 771-4804 and email: [Brad.A.Knisley@dom.com](mailto:Brad.A.Knisley@dom.com).

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 7 copies of filings made in the proceeding with the Commission and must mail a copy to the applicant and to every other party. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as

possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 7 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the "eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an "eSubscription" link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov), or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.
