Information Collection Request Title: Develop and Implement UCARE4LIFE Message Library (OMB No. 0915-xxxx)—New

Abstract: HRSA HIV/AIDS Bureau (HAB) will develop and implement the UCARE4LIFE message library project aimed at increasing HIV primary care retention rates for racial and ethnic minority youth aged 15 to 24 living with HIV/AIDS. The primary aims are: (1) to develop, test, and maintain a text message library, which addresses topics of HIV disease management, e.g. appointment keeping, retention in care, and medication adherence rates; and (2) to develop, implement, conduct, and evaluate a pilot study of delivering text messages to targeted youth receiving care at Ryan White grantee sites and other clinical sites. HRSA awarded a two-year contract to the Research Triangle Institute (RTI) International to conduct the UCARE4Life project. The UCARE4Life project is supported by the Department of Health and Human

Services Secretary's Minority AIDS Initiative Fund (SMAIF), fiscal year (FY) 2012 and FY2013 and a gift from the M.A.C. AIDS Fund.

The first phase of this project will include focus group interviews with the target audience to test the messages (Aim 1). Approximately 128 individuals will be screened to assess focus group eligibility. Four focus groups will be conducted with up to eight participants in each for a total sample size of 32.

The second phase of this project involves the evaluation of the pilot study (Aim 2). This will encompass data collection with patients and providers. Patient participants for the pilot study will be recruited from 10 clinical sites, some of which will be Ryan White grantees. Up to 1,000 individuals will be

screened to determine eligibility for the pilot study to recruit a sample of 500 participants (50 from each clinical site). Participants will complete a baseline survey, 3-month survey, 6-month survey, and follow-up survey at 9 months. In addition, 10 patient participants from each clinical site will be selected to participate in an in-depth, qualitative telephone interview for a total of 100 interviews. Finally, up to three clinic staff from the 10 participating clinics will take part in in-depth, qualitative telephone interviews (N=30).
