SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we initiate our process for developing CCPs for the Rocky Mountain Arsenal National Wildlife Refuge in Commerce City, CO, and the Two Ponds National Wildlife Refuge in Arvada, CO. This notice complies with our CCP policy to (1) advise other Federal and State agencies, Tribes, and the public of our intention to conduct detailed planning on these refuges and (2) to obtain suggestions and information on the scope of issues to consider in the environmental document and during development of the CCPs.

Background

The CCP Process

The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd-668ee) (Administration Act) as amended by the National Wildlife Refuge System Improvement Act of 1997, requires us to develop a CCP for each unit of the National Wildlife Refuge System (NWRS). The purpose for developing a CCP is to provide the managers of the units of the NWRS with a 15-year plan for achieving the units' purposes and contributing toward the mission of the NWRS, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify compatible wildlife-dependent recreational opportunities available to the public, including, where appropriate, opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update the CCPs at least every 15 years in accordance with the Administration Act.

Each unit of the NWRS was established for specific purposes. We use these purposes as the foundation for developing and prioritizing the management goals and objectives for each unit within the NWRS and to determine how the public can enjoy public uses in the NWRS units. The planning process is a way for us and the public to evaluate management goals and objectives that will ensure the best possible approach to wildlife, plant, and habitat conservation, while providing for wildlife-dependent recreation
