

this collection of information is estimated to range between 5.5 hours and 140 hours per response, depending upon the nature of the respondent. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/Affected Entities: Entities potentially affected by this ICR are local education agencies (LEAs, e.g., elementary or secondary public school districts or a private school or school system); asbestos training providers to schools and educational systems; state education departments or commissions; or state public health departments or commissions.

Estimated total number of potential respondents: 133,507.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 2,487,439 hours.

Estimated total annual costs: \$91,829,253. This includes an estimated burden cost of \$9.

IV. Are There Changes in the Estimates from the Last Approvals?

ICR number: 1246.12. There is no change in the number of hours in the total estimated respondent burden compared with that identified in the ICRs currently approved by OMB.

ICR number: 1365.10. There is a decrease of 105,449 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects EPA's reduced estimate of the number of schools containing friable asbestos-containing materials. This change is an adjustment.

V. What is the Next Step in the Process for these ICRs?

EPA will consider the comments received and amend the ICRs as appropriate. The final ICR packages will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICRs to OMB and the opportunity to submit additional comments to OMB. If you have any questions about the ICRs or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Abstract: This Information Collection Request (ICR) renewal supports activities to implement the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), Subpart J (40 CFR 300.900, "Use of Dispersants and Other Chemicals"). Subpart J of the NCP governs the use of bioremediation agents, dispersants, surface washing agents, surface collecting agents, sorbents, and miscellaneous agents in response to oil spills in U.S. waters or adjoining shorelines (40 CFR 300.900). Subpart J requirements include criteria for listing oil spill mitigating agents on the NCP Product Schedule, hereafter referred to as the Schedule. EPA's regulation, which is codified at 40 CFR 300.900, requires that EPA prepare a schedule of "dispersants, other chemicals, and other spill mitigating devices and substances, if any, that may be used in carrying out the NCP. Section 300.910 of Subpart J addresses the authorization of the use of products on the Schedule and specifies the conditions under which OSCs may authorize the use of dispersants, other chemicals, and other spill mitigating substances.

The Schedule is required by section 311(d)(2)(G) of the Clean Water Act (CWA), as amended by the Oil Pollution Act of 1990. The Schedule is used by

federal On-Scene Coordinators (OSCs), Regional Response Teams (RRTs), and Area Planners to identify spill mitigating agents in preparation for and response to oil spills.

Form Numbers: None

Respondents/affected entities: Private manufacturers.

Respondent's obligation to respond: Required to obtain or retain benefits.

Estimated number of respondents: 11 per year.

Frequency of response: Once.

Total estimated burden: 315 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$88,743 (per year), includes \$72,450 annualized capitol or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 75 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to the expectation that the number of manufacturer respondents will decrease from 14 to 11 per year.
