

Oklahoma Field Office, Tulsa, Oklahoma, is extending the scoping period for an RMP with an associated EIS for the Oklahoma, Kansas, and Texas planning area. The EIS will also analyze decisions for Indian lands and mineral interests administered by the BIA Eastern Oklahoma and Southern Plans Regional Offices. The BLM will be the lead agency in the RMP/EIS development effort, and the BIA will participate as a cooperating agency and sign a separate Record of Decision for management decisions for Indian lands and mineral interests. For additional information regarding the planning area, issues, and planning criteria, please refer to the original Notice of Intent published on July 26, 2013 (78 FR 45266).

You may submit comments on issues and planning criteria in writing to the BLM at any public scoping meeting, or you may submit them to the BLM using one of the methods listed in the **ADDRESSES** section above. To be most helpful, you should submit comments by the close of the 30 day scoping period or within 15 days after the last public meeting, whichever is later.

Parties interested in leasing and development of Federal coal in the planning area should provide coal resource data for their area(s) of interest. Specifically, information is requested on the location, quality, and quantity of Federal coal with development potential, and on surface resource values related to the 20 coal unsuitability criteria described in 43 CFR part 3461. This information will be used for any necessary updating of coal screening determination (43 CFR 3420.1-4) in the Decision Area and in the environmental analysis for the RMP. In addition to coal resource data, the BLM seeks resource information and data for other public land values (e.g., air quality, cultural and historic resources, fire/fuels, fisheries, forestry, lands and realty, non-energy minerals and geology, oil and gas, paleontology, rangeland management, recreation, soil, water, and wildlife) in the planning area. The purpose of this request is to assure that the planning effort has sufficient information and data to consider a reasonable range of resource uses, management options, and alternatives for the public lands.

The BLM will use an interdisciplinary approach to develop the plan in order to consider the variety of resource issues and concerns identified. Specialists with expertise in the following disciplines will be involved in the planning process: Minerals and geology, archaeology, wildlife and fisheries, lands and realty, hydrology, soils,

livestock grazing, recreation, sociology, and economics.

Authority: 40 CFR 1501.7, 43 CFR 1610.2
