Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the FCC is notifying the public that it received OMB approval on September 26, 2013, which contained new and modified information collection requirements, in 47 CFR 1.946(d), 27.10(d), 27.12, and 27.17, which would not be effective until approved by the Office of Management and Budget. The information collection was adopted in the Report and Order in WT Docket No. 12-357, FCC 13-88, which appears at 78 FR 50213, August 16, 2013, adopts flexible use rules for 10 megahertz of spectrum in the 1915–1920 MHz and 1995–2000 MHz spectrum bands (H Block) that would increase the nation's supply of spectrum for mobile broadband. We adopt H Block terrestrial service rules, modified as necessary to account for issues unique to the H Block bands. First, we find the spectrum is properly allocated for commercial use as required by the Spectrum Act. Second, we determine the H Block can be used without causing harmful interference to PCS operations in the 1930–1995 MHz band. Third, we establish 1915–1920 MHz paired with 1995–2000 MHz as the H Block band plan. Fourth, we adopt technical rules that authorize mobile and fixed operations in the bands and protect operations in adjacent and nearby spectrum bands from harmful interference pursuant to the requirements of the Spectrum Act. Fifth,

we adopt cost sharing rules that require H Block licensees to pay a pro rata share of expenses incurred through clearing the 1915–1920 MHz and 1995–2000 MHz bands. Sixth, we adopt a variety of flexible use regulatory, licensing, and operating rules for H Block licensees. Seventh, we adopt performance requirements for the H Block spectrum. Specifically, a licensee of H Block will be subject to build-out requirements that require a licensee to provide terrestrial signal coverage and offer terrestrial service to at least 40 percent of its license areas' population within four years, and to at least 75 percent of the population in each of its license areas within ten years, and to appropriate penalties if these benchmarks are not met. Eighth, we adopt procedures to assign H Block licenses through a system of competitive bidding.

The effective date of the rules adopted in that Report and Order was published as August 16, 2013, except for §§ 1.946(d), 27.10(d), 27.12, and 27.17. Through this document, the Commission announces that it has received this approval (new OMB Control No. 3060–1184, Expiration Date: September 30, 2016) and that §§ 1.946(d), 27.10(d), 27.12, and 27.17 were approved by OMB on September 26, 2013.

The Commission has also received approval to add the national security certification required by Section 6004 of the Middle Class Tax Relief and Job Creation Act of 2012, 47 U.S.C 1404, to the FCC Form 601. Additionally, the FCC Form 601 is revised to update the Alien Ownership certifications pursuant to the Second Report and Order, FCC 13–50, IB Docket 11–133, Review of Foreign Ownership Policies for Common Carrier and Aeronautical Radio Licensees under section 310(b)(4) of the Communications Act of 1934, as Amended, published at 78 FR 41314–01 on July 10, 2013, *available at* <http://www.gpo.gov/fdsys/pkg/FR-2013-07-23/pdf/2013-17711.pdf>.

Needs and Uses: FCC Form 601 is a consolidated, multi-part application form, or “long form,” that is used for general market-based licensing and site-by-site licensing for wireless telecommunications and public safety services filed through the Commission’s Universal Licensing System (ULS). FCC Form 601 is composed of a main form that contains the administrative information and a series of schedules used for filing technical and other information. Respondents are encouraged to submit FCC Form 601 electronically and are required to do so when submitting FCC Form 601 to apply for an authorization for which the applicant was the winning bidder in a spectrum auction.

The data collected on FCC Form 601 include the FCC Registration Number (FRN), which serves as a “common link” for all filings an entity has with the FCC. The Debt Collection Improvement Act of 1996 requires that those entities filing with the Commission to use a FRN.

FCC Form 601 is being used for auctionable services as they are implemented; FCC Form 601 is used to apply for a new authorization, or to amend a pending application for an authorization to operate a license wireless radio services. This includes Public Mobile Services, Personal Communications Services, General Wireless Communications Services, Private Land Mobile Radio Services, Broadcast Auxiliary Services, Fixed Microwave Services, Instructional Television Fixed Service (ITFS) and the

Multipoint Distribution Service (MDS), Maritime Services (excluding ships), and Aviation Services (excluding aircraft). It may also be used to modify or renew an existing license, cancel a license, withdraw a pending application, obtain a duplicate license, submit required notifications, request an extension of time to satisfy construction requirements, or request an administrative update to an existing license (such as mailing address change), request a Special Temporary Authority (STA) or a Developmental License.

The FCC Form 601 is revised to add a National Security Certification that is applicable to applicants for licenses issued as a result of the Middle Class Tax Relief and Job Creation Act of 2012 (2012 Spectrum Act). Section 6004 of the 2012 Spectrum Act, 47 U.S.C 1404, prohibits a person who has been, for reasons of national security, barred by any agency of the Federal Government from bidding on a contract, participating in an auction, or receiving a grant from participating in any auction that is required or authorized to be conducted pursuant to the 2012 Spectrum Act.

Additionally, the FCC Form 601 is being revised to update the Alien Ownership certifications pursuant to the Second Report and Order FCC 13–50 IB Docket 11–133 Review of Foreign Ownership Policies for Common Carrier and Aeronautical Radio Licensees under section 310(b)(4) of the Communications Act of 1934, as Amended.

The Commission will use the information to ensure H Block licensees' compliance with required filings of notifications, certifications, regulatory status changes, and applicable performance benchmarks. Also, such information will be used to verify whether H Block applicants and, in the context of the national security certification requirement, whether other applicants for Spectrum Act licenses are legally and technically qualified to hold licenses; and to determine compliance with Commission rules. Any submissions made through the Universal Licensing System must be filed electronically.

Federal Communications Commission.
