

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* New Collection.

(2) *Title of the Form/Collection:* DNA Evidence in Refugee Processing.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* G-1294, DNA Collection Consent Form (Laboratory Test) and G-1295, DNA Collection Consent Form (Rapid Test); USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:*

Primary: Individuals or households. Overseas applicants for refugee status filing through the USCIS Form I-590 (OMB Control Number 1615-0068) that have a spouse and/or child(ren) must meet all requirements of Immigration and Nationality Act § 207(c)(2) and have the necessary burden of proof to establish the relationship(s). In the case of a parent-child relationship, there is often a degree of difficulty in establishing this for refugee populations that often lack reliable documentation. USCIS is seeking to allow I-590 applicants to provide DNA testing results through an AABB accredited laboratory, and in coordination with the USCIS overseas office, to provide effective and credible evidence of this parent-child relationship. USCIS is also seeking to conduct simultaneous Rapid DNA testing as a pilot to make a determination if the Rapid DNA machines provide a valid alternative to traditional DNA testing. USCIS will be collecting samples for traditional DNA testing through an AABB accredited laboratory in conjunction with the Rapid DNA pilot to test the validity of the results obtained during the pilot. The collection of DNA, regardless of process employed, is strictly voluntary and refusal to provide a sample does not adversely impact an applicant's I-590 application.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 60 respondents for the standard DNA process with a total of 360 hours of burden with an estimated

average of 6 hours per response. 250 respondents for the Rapid DNA process with a total of 110 hours of burden with an estimated average of .44 hours per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual public burden for this collection of information is 470 hours.

Endangered and Threatened Wildlife and Plants; Initiation of 5-Year Status Reviews of Nine Listed Animal and Two Listed Plant Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of initiation of reviews; request for information.

SUMMARY: We, the U.S. Fish and Wildlife Service, are initiating 5-year status reviews under the Endangered Species Act of 1973, as amended (Act), for nine animal and two plant species. A 5-year status review is based on the best scientific and commercial data available at the time of the review; therefore, we are requesting submission of any such information that has become available since the last review for the species.

DATES: To ensure consideration, please send your written information by September 8, 2014. However, we will continue to accept new information about any listed species at any time.

ADDRESSES: For how to send comments or information for each species, see the table in the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: To request information, contact the appropriate person in the table in the **SUPPLEMENTARY INFORMATION** section. Individuals who are hearing impaired or speech impaired may call the Federal Relay Service at 800–877–8339 for TTY assistance.

SUPPLEMENTARY INFORMATION: We are initiating 5-year status reviews under the Endangered Species Act of 1973, as amended (Act), for nine animal and two plant species: Gray bat (*Myotis grisescens*), Indiana bat (*Myotis sodalis*), Piping plover–Great Lakes breeding population (*Charadrius melanotos*), Piping plover–Atlantic Coast and Northern Great Plains populations (*Charadrius melanotos*), Scioti madtom (*Noturus troutmani*), Curtis' Pearlymussel (*Epioblasma florentina curtisi*), Purple cat's paw (*Epioblasma (=dysnomia) obliquata obliquata*), Scaleshell mussel (*Leptodea leptodon*), Higgins eye (*Lampsilis higginsii*), Pitcher's thistle (*Cirsium pitcheri*), and

Lakeside daisy (*Hymenoxys herbacea* (=*H. acaulis* var. *glabra*)).

Why do we conduct 5-year reviews?

Under the Act (16 U.S.C. 1531 *et seq.*), we maintain Lists of Endangered and Threatened Wildlife and Plants (which we collectively refer to as the List) in the Code of Federal Regulations (CFR) at 50 CFR 17.11 (for animals) and 17.12 (for plants). Section 4(c)(2)(A) of the Act requires us to review each listed species' status at least once every 5 years. Our regulations at 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing those species under active review. For additional information about 5-year reviews, go to <http://www.fws.gov/endangered/what-we-do/recovery-overview.html>, scroll down to "Learn More about 5-Year Reviews," and click on our factsheet.

What information do we consider in our review?

A 5-year review considers all new information available at the time of the review. In conducting these reviews, we consider the best scientific and commercial data that have become available since the listing determination or most recent status review, such as:

(A) Species biology, including but not limited to population trends, distribution, abundance, demographics, and genetics;

(B) Habitat conditions, including but not limited to amount, distribution, and suitability;

(C) Conservation measures that have been implemented that benefit the species;

(D) Threat status and trends in relation to the five listing factors (as defined in section 4(a)(1) of the Act); and

(E) Other new information, data, or corrections, including but not limited to taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

Any new information will be considered during the 5-year review and will also be useful in evaluating the ongoing recovery programs for the species.

What species are under review?

This notice announces our active 5-year status reviews of the species in the following table.
