I. Background

NHTSA was established as the successor to the National Highway Safety Bureau in 1970, to carry out safety programs under the National Traffic and Motor Vehicle Safety Act of 1966 (Chapter 301 of Title 49, United States Code) and the Highway Safety Act of 1966 (Chapter 4 of Title 23, United States Code). The agency also administers consumer programs established by the Motor Vehicle Information and Cost Saving Act of 1972 (Part C of Subtitle VI (Chapters 321, 323, 325, 327, 329 and 331) of Title 49, United States Code). NHTSA’s mission is to save lives, prevent injuries, and reduce traffic-related health care and other economic costs due to road traffic crashes through education, research, safety standards, and enforcement activity.

In order to address these public health issues and economic costs of highway crashes, the agency seeks to improve public health by helping to make highway travel safer. The agency develops, promotes and implements educational, regulatory, enforcement and emergency medical service programs aimed at ending preventable tragedies and reducing the economic costs associated with motor vehicle use and highway travel. A multi-disciplinary approach that draws upon diverse fields such as epidemiology, engineering, biomechanics, emergency medicine, the social sciences, human factors, economics, education, law enforcement, and communication science to address one of the most complex and challenging public health problems facing our society.

NHTSA is a leader in collecting and analyzing motor vehicle crash data, in conducting research, and in developing countermeasures designed to prevent and mitigate vehicle crashes, thereby reducing associated fatalities and traumatic injury. The agency improves traffic safety through its regulation and enforcement of motor vehicle and motor
