

Authority are not currently available in the United States. There is no assembly or testing facility for HSR trainsets operating at speeds greater than 160 mph in the United States. Moreover, FRA estimates that it could take HSR trainset manufacturers a minimum of one-and-a-half to two years to establish the required facilities to support a domestic HSR trainset assembly capability. This includes any HSR trainset manufacturers that currently have passenger railcar manufacturing facilities in the United States. For example, in addition to acquiring specialized machinery and training and hiring the workforce, these manufacturers' plants are currently customized for steel railcars, and HSR trainsets use aluminum, which requires different manufacturing techniques.

In addition, Tier III HSR is a significant new technology for the U.S. market, and safety is a significant factor. Allowing final assembly of the prototype HSR trainsets at the manufacturer's existing non-domestic facilities is necessary to ensure that expected safety benefits of "service-proven" systems are secured, to enable training of domestic workers, and to assure successful technology transfer. For example, rather than attempting to establish new manufacturing and assembly processes at a domestic facility while simultaneously integrating and testing HSR trainset designs, the selected manufacturer(s) can focus on identifying and remedying any defects in the designs specific to Amtrak and the Authority and their operations in the United States. FRA concludes that integrating manufacturing, assembly, and labor resources into the prototype production, among other suggested actions by Amtrak and the Authority, will facilitate the development of domestic HSR production facilities. This same "human technology transfer" has been successful in other global HSR installations in South Korea, China, Taiwan, and Spain.

On March 14, 2014, FRA published on its Web site public notice of Amtrak's and the Authority's waiver requests. FRA received 13 online comments and one mailed response to this notice. None of the commenters identified a domestic source for HSR trainsets. Of the 14 comments, 10 commenters indicated they were against granting the waiver; four were for granting the waiver. Of the 10 comments "against," four were not responsive to the notice. Of the six remaining dissenters, they mainly disagreed with Amtrak's and the Authority's argument that HSR trainsets cannot be delivered in a reasonable time because Amtrak

and the Authority could wait for domestic assembly. While this is theoretically possible, significant capacity and technology transfer problems are probable, and FRA believes that the one-and-a-half to two-year minimum delay could negatively impact the schedules proposed by Amtrak and the Authority. In addition, as noted above, FRA believes that allowing the prototypes to be assembled at the manufacturers' non-domestic factories will facilitate the successful technology transfer and training of U.S. workers. Finally, because FRA is limiting the waivers to final assembly of up to four prototypes with the expectation that the training of domestic resources will occur simultaneously, FRA is not delaying or preventing the establishment of the selected supplier's domestic assembly facilities. FRA finds that this delay to provide "service-proven" systems makes the prototypes not available within a "reasonable time." Therefore, waivers are appropriate.

FRA will publish the letters granting Amtrak's and the Authority's waiver requests on its Web site at: <http://www.fra.dot.gov/eLib/Details/L16035> and <http://www.fra.dot.gov/eLib/Details/L16036>, respectively.
