ACTION: Notice and Request for OMB Review and Comment.

The proposed collection will be used by DOE to meet its overall national security and Department of Homeland Security's National Response Framework responsibilities. DOE will use the data from this form to obtain current information regarding emergency situations on U.S. electric energy supply systems. The data also may be used to develop legislative recommendations,

reports to the Congress and as a basis for DOE investigations following severe, prolonged, or repeated electric power reliability problems.

DATES: Comments regarding this proposed information collection must be received on or before January 30, 2015. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, please advise the DOE Desk Officer at OMB of your intention to make a submission as soon as possible. ADDRESSES: Written comments should be sent to the

DOE Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10102, 735 17th Street NW., Washington, DC 20503.

And to

OE-417 Survey Manager, Office of Electricity Delivery and Energy Reliability, OE-40, Reference: OE-417 2014 Renewal, 1000 Independence Avenue SW., Washington, DC 20585.

This program collects, analyzes, and disseminates information on energy resource reserves, production, demand, technology, and related economic and statistical information. This information is used to assess the adequacy of energy resources to meet near and longer-term domestic demands.

Currently, OE uses Form OE-417 to monitor major system incidents on the electric power systems, assess power generating capacity in the event of a significant disruption, and to conduct after-action non-regulatory investigations on significant interruptions of electric power. The information is used to meet DOE national-security responsibilities and requirements as set forth in the U.S. Department of Homeland Security's National Response Framework. The information may also be used in developing legislative recommendations/reports to Congress and coordinating Federal efforts regarding activities such as incidents/disturbances in critical infrastructure protection, the continuity of electric industry operations, and the continuity of operations. The information submitted may also be used by OE to analyze significant power interruptions of electric power from a non-regulatory perspective.

Based upon feedback received from the 60-Day **Federal Register** Notice, OE does not intend to proceed with protecting Schedule 2 of Form OE-417 under the Confidential Information Protection and Statistical Efficiency Act of 2002.
