Exxon Valdez Oil Spill Public Advisory Committee

AGENCY: Office of the Secretary, Interior.

ACTION: Meeting Notice.

SUMMARY: The Department of the Interior, Office of the Secretary is announcing a public meeting of the Exxon Valdez Oil Spill Public Advisory Committee.

DATES: February 4, 2015, at 1:00 p.m.

ADDRESSES: Endeavor Room of the Captain Cook Hotel, 939 W. 5th Avenue, Anchorage, Alaska.

FOR FURTHER INFORMATION CONTACT: Dr. Philip Johnson, Department of the Interior, Office of Environmental Policy and Compliance, 1689 "C" Street, Suite 119, Anchorage, Alaska, (907) 271-5011.

SUPPLEMENTARY INFORMATION: The Exxon Valdez Oil Spill Public Advisory Committee was created by Paragraph V.A.4 of the Memorandum of Agreement and Consent Decree entered into by the United States of America and the State of Alaska on August 27, 1991, and approved by the United States District Court for the District of Alaska in settlement of *United States of America v. State of Alaska*, Civil Action No. A91-081 CV.

The Exxon Valdez Oil Spill Public Advisory Committee Meeting agenda will include orientation for committee members, election of the committee chair, and discussion of the Exxon Valdez Oil Spill Trustee Council's Long-Term Herring and Monitoring Programs and habitat-related matters. An opportunity for public comments will be provided. The final agenda and materials for the meeting will be posted on the Exxon Valdez Oil Spill Trustee Council Web site at www.evostc.state.ak.us. All Exxon Valdez Oil Spill Public Advisory

Committee meetings are open to the public.

Mary Josie Blanchard,
*Deputy Director, Office of Environmental
Policy and Compliance.*

Endangered and Threatened Wildlife and Plants; Draft Recovery Plan for Baker's Larkspur (*Delphinium bakeri*)

AGENCY: Fish and Wildlife Service,
Interior.

ACTION: Notice of document
availability.

SUMMARY: We, the U.S. Fish and Wildlife Service, announce the availability of the Draft Recovery Plan for Baker's Larkspur (*Delphinium bakeri*) for public review and comment. The recovery plan includes downlisting objectives and criteria, and specific actions necessary to reclassify the species from endangered to threatened on the Federal Lists of Endangered and Threatened Wildlife and Plants.

DATES: We must receive any comments on the draft recovery plan on or before March 16, 2015.

ADDRESSES: You may obtain a copy of the recovery plan from our Web site at <http://www.fws.gov/endangered/species/recovery-plans.html>.

Alternatively, you may contact the Sacramento Fish and Wildlife Office, U.S. Fish and Wildlife Service, 2800 Cottage Way, Suite W-2605, Sacramento, CA 95825 (telephone 916-414-6700).

FOR FURTHER INFORMATION CONTACT: Jennifer Norris, Field Supervisor, at the above street address or telephone number (see **ADDRESSES**).

SUPPLEMENTARY INFORMATION:

Background

Recovery of endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of our endangered species program and the Endangered Species Act of 1973, as amended (Act; 16 U.S.C. 1531 *et seq.*). Recovery means improvement of the status of listed species to the point at which listing is no longer appropriate under the criteria specified in section 4(a)(1) of the Act.

The Act requires the development of recovery plans for listed species, unless such a plan would not promote the conservation of a particular species.

We listed Baker's larkspur throughout its entire range on January 26, 2000 (65 FR 4156). The species is endemic to Marin and Sonoma Counties, California, and is currently known from one small historical occurrence along Marshall-Petaluma Road in west Marin County. The remaining historical occurrence of Baker's larkspur occurs on decomposed shale in the mixed woodland plant community at an elevation range of 295 feet (ft) (90 meter (m)) to 672 ft (205 m) in moderately moist, shaded conditions on a shallow veneer of soil along an extensive north-facing slope. These habitat requirements limit the availability of suitable reintroduction sites with appropriate habitat conditions and compatible land use. Although habitat conversion and road maintenance were historically responsible for decreasing numbers, those threats have been curtailed. Because of the extreme range restriction of this already-narrow endemic, and its small population size, the plant is highly vulnerable to extinction from random events, including wildfire, herbivory, disease and pest outbreaks, and human disturbance.

Recovery Plan Goals

The purpose of a recovery plan is to provide a framework for the recovery of species so that protection under the Act is no longer necessary. A recovery plan includes scientific information about the species and provides criteria that enable us to gauge whether downlisting or delisting the species is warranted. Furthermore, recovery plans help guide our recovery efforts by describing actions we consider necessary for each species' conservation and by estimating time and costs for implementing needed recovery measures.

The goal of this recovery plan is to improve the status of Baker's larkspur so that it can be downlisted. Due to the current lack of information about the species' biology and habitat requirements, the magnitude of current threats, and the precarious environment where the single historical population of the species persists, we are unable to determine appropriate delisting criteria; therefore, we focus on meeting the goal of downlisting. To meet the recovery goal of downlisting, the following objectives have been identified:

1. Expand the existing populations of Baker's larkspur and establish additional self-sustaining populations of Baker's larkspur throughout its known ecological and

geographical range, while preserving extant genetic diversity.

2. Ensure existing and future populations are protected from incompatible uses, such as road maintenance.

3. Reduce herbivory by slugs, snails, and gophers to the point that it does not affect the species at a population level.

As Baker's larkspur meets reclassification criteria, we will review its status and consider it for downlisting on the Federal Lists of Endangered and Threatened Wildlife and Plants.

Public Comments Solicited

We solicit written comments on the draft recovery plan described in this notice. All comments received by the date specified above will be considered in development of a final recovery plan for Baker's larkspur. You may submit written comments and information by mail or in person to the Sacramento Fish and Wildlife Office at the above address (see **ADDRESSES**).

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority

We developed this recovery plan under the authority of section 4(f) of the Act, 16 U.S.C. 1533(f). We publish this notice under section 4(f) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Dated: January 7, 2015.

Alexandra Pitts,

Acting Regional Director, Pacific Southwest Region.

Draft Environmental Assessment and Proposed Wright Solar Park Multi-Species Habitat Conservation Plan, Merced County, California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability and request for comment; permit application, draft environmental assessment, proposed habitat conservation plan.

SUMMARY: This notice advises the public that we, the U.S. Fish and Wildlife Service (Service), have prepared a draft environmental assessment (EA) under the National Environmental Policy Act of 1969, as amended (NEPA), in response to an application from Wright Solar Park, LLC (the applicant) for an incidental take permit (ITP) pursuant to the Endangered Species Act of 1973, as amended (Act). The applicant has prepared the draft Wright Solar Park Habitat Conservation Plan (HCP) to describe and implement a conservation plan that will minimize and mitigate environmental effects associated with the construction, operation, maintenance, and decommissioning of an up-to-200-megawatt photovoltaic power generating facility and implementation of conservation actions associated with the Habitat Conservation Plan in Merced County, California. We also announce a 60-day public comment period on the permit application, including the draft EA and the proposed HCP. We request data, comments, new information, or suggestions from the public, other concerned governmental agencies, the scientific community, Tribes, industry, or any other interested party.

DATES: To ensure consideration, please send your written comments by March 16, 2015.

ADDRESSES: Please address written comments to Mike Thomas, Chief, Conservation Planning Division, Sacramento Fish and Wildlife Office, 2800 Cottage Way, W-2605, Sacramento, CA 95825. Alternatively, you may send comments by facsimile to (916) 414-6713.

FOR FURTHER INFORMATION CONTACT: Mike Thomas, Chief, Conservation Planning Division, or Eric Tattersall, Deputy Assistant Field Supervisor, at the address in **ADDRESSES** or at (916) 414-6600 (telephone). If you use a telecommunications device for the deaf, please call the Federal Information Relay Service at (800) 877-8339.

SUPPLEMENTARY INFORMATION: This notice advises the public that we, the U.S. Fish and Wildlife Service (Service), have prepared a draft environmental assessment (EA) under the National Environmental Policy Act of 1969, as amended (NEPA), in response to an application from Wright Solar Park, LLC (the applicant) for an incidental take permit (ITP) pursuant to the Endangered

Species Act of 1973, as amended (Act). The application addresses the proposed incidental take (take) of three animal species proposed as "covered species" within a 5,181-acre permit area during a proposed permit term of 40 years. The applicant has prepared the draft Wright Solar Park Habitat Conservation Plan (HCP) to describe and implement a conservation plan that will minimize and mitigate environmental effects associated with the construction, operation, maintenance, and decommissioning of an up-to-200-megawatt photovoltaic power generating facility and implementation of conservation actions associated with the Habitat Conservation Plan in Merced County, California. We also announce a 90-day public comment period on the permit application, including the draft EA and the proposed HCP. We request data, comments, new information, or suggestions from the public, other concerned governmental agencies, the scientific community, Tribes, industry, or any other interested party.

We publish this notice under the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321-4347 *et seq.*; NEPA), and its implementing regulations in the Code of Federal Regulations (CFR) at 40 CFR parts 1500-1508, as well as in compliance with section 10(c) of the Endangered Species Act (16 U.S.C. 1531-1544 *et seq.*; Act).

Availability of Documents

You may obtain copies of the draft EA and the draft HCP from the individuals in **FOR FURTHER INFORMATION CONTACT**, or from the Sacramento Fish and Wildlife Office Web site at <http://www.fws.gov/sacramento>. Copies of these documents are also available for public inspection, by appointment, during regular business hours, at the Sacramento Fish and Wildlife Office (see **ADDRESSES**).

Background Information

Section 9 of the Act (16 U.S.C. 1531-1544 *et seq.*) and Federal regulations (50 CFR part 17) prohibit the taking of fish and wildlife species listed as endangered or threatened under section 4 of the Act. "Take" of federally listed fish or wildlife is defined under the Act as to "harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to engage in such conduct" (16 U.S.C. 1532(19)). The term "harm" is defined in the regulations as "an act which actually kills or injures wildlife. Such act may include significant habitat modification or degradation where it actually kills or injures wildlife by significantly impairing essential behavioral patterns, including breeding, feeding, or sheltering" (50 CFR 17.3).
