Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the General Provisions specified at 40 CFR part 63, subpart JJJJ. Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative.

Form Numbers: None.

Respondents/affected entities: Paper and other web coating facilities.

Respondent’s obligation to respond: Mandatory (40 CFR part 63, subpart JJJJ).

Estimated number of respondents: 251 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 13,800 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,390,000 (per year), includes \$1,010,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the respondent and Agency burden, including the respondent O&M cost. The increase is not due to any program changes. Rather, it is due to an increase in the estimated

number of sources subject to the rule. Based on information from previous ICR renewals and past industry analyses conducted by the Agency, we assume a linear growth rate of 6 new sources per year for this sector. The growth in the number of sources subject to this NESHAP results in an increase in the total estimated burden hours and costs.

Form Numbers: None.

Respondents/affected entities:

Owners or operators of coke oven batteries at a coke plant that is a major source of HAP.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart CCCCC).

Estimated number of respondents: 17 (total).

Frequency of response: Initially, occasionally, quarterly, and semiannually.

Total estimated cost: \$2,600,000 (per year), includes \$152,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an overall decrease in the respondent and Agency burden, including a decrease in labor hours, labor cost, O&M cost, and estimated number of responses. The decrease from the previous ICR occurred because two U.S. Steel facilities have closed in the past three years. These two facilities operated 5 by-product batteries. The facility closure information was obtained through EPA OAQPS, trade associations, and facility representatives.

Abstract: The Resource Conservation and Recovery Act (RCRA) requires EPA to establish a national regulatory program to ensure that hazardous wastes are managed in a manner protective of human health and the environment. Under this program, EPA regulates newly generated hazardous wastes, as well as hazardous remediation wastes (*i.e.*, hazardous wastes managed during cleanup). Hazardous remediation waste management sites must comply with all parts of 40 CFR part 264 except subparts B, C, and D. In place of these requirements, they need to comply with performance standards based on the general requirement goals in these sections, which are codified at 40 CFR 264.1(j).

Under § 264.1(j), owners/operators of remediation waste management sites
