**Request for New Information**

To ensure that a 5-year review is complete and based on the best available scientific and commercial information, we request new information from all sources. See "What Information Do We Consider in Our Review?" for specific criteria. If you submit information, please support it with documentation such as maps, bibliographic references, methods used to gather and analyze the data, and/or copies of any pertinent publications, reports, or letters by knowledgeable sources.

If you wish to provide information for any species listed above, please submit your comments and materials to the appropriate contact in the Pacific Islands Fish and Wildlife Office, Oregon Fish and Wildlife Office, or Idaho Fish and Wildlife Office (see **ADDRESSES** section).

**Public Availability of Comments**

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Comments and materials received will be available for public inspection, by appointment, during normal business

hours at the offices where the comments are submitted.

**Completed and Active Reviews**

A list of all completed and currently active 5-year reviews addressing species for which the Pacific Region of the Service has lead responsibility is available at <http://www.fws.gov/pacific/ecoservices/angered/recovery/5year.html>.

**Authority**

This document is published under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Dated: December 7, 2015.

**Endangered Species; Issuance of Permits**

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of issuance of permits.

**SUMMARY:** We, the U.S. Fish and Wildlife Service, have issued the following permits to conduct certain activities with endangered and

threatened species under the authority of the Endangered Species Act, as amended (Act). With some exceptions, the Act prohibits activities with listed species unless a Federal permit is issued that allows such activity. We provide this list for the convenience of the public as a summary of our permit issuances for the calendar year 2015.

**FOR FURTHER INFORMATION CONTACT:** See the contact information in the Permits Issued section.

**SUPPLEMENTARY INFORMATION:** We have issued the following permits to conduct activities with endangered and threatened species in response to recovery permit applications that we received under the authority of section 10(a)(1)(A) of the Act (16 U.S.C. 1531 *et seq.*). These permits were issued between January 1, 2015, and December 31, 2015. Each permit was issued only after we determined that it was applied for in good faith, that granting the permit would not be to the disadvantage of the listed species, that the proposed activities were for scientific research or would benefit the recovery or the enhancement of survival of the species, and that the terms and conditions of the permits were consistent with the purposes and policy set forth in the Act.

### Agency Information Collection Activities: Comment Request

**AGENCY:** U.S. Geological Survey (USGS), Interior.

**ACTION:** Notice of a revision of a currently approved information collection (1028-0106).

**SUMMARY:** We (the U.S. Geological Survey) will ask the Office of Management and Budget (OMB) to approve the information collection (IC) described below. As required by the Paperwork Reduction Act (PRA) of 1995, and as part of our continuing

efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to take this opportunity to comment on this IC. This collection is scheduled to expire on May 31, 2016.

**DATES:** To ensure that your comments are considered, we must receive them on or before April 12, 2016.

**ADDRESSES:** You may submit comments on this information collection to the Information Collection Clearance Officer, U.S. Geological Survey, 12201 Sunrise Valley Drive, MS 807, Reston, VA 20192 (mail); (703) 648-7197 (fax); or [gs-info\\_collections@usgs.gov](mailto:gs-info_collections@usgs.gov) (email). Use 'Information Collection Number 1028-0106, Ash Fall Report' in the subject line.

### SUPPLEMENTARY INFORMATION:

#### I. Abstract

The USGS provides notifications and warnings to the public of volcanic activity in the US in order to reduce the loss of life, property, and economic and societal impacts. Ash fallout to the ground can pose significant disruption and damage to buildings, transportation, water and wastewater, power supply, communications equipment, agriculture, and primary production leading to potentially substantial

societal impacts and costs, even at thicknesses of only a few millimeters or inches. Additionally, fine grained ash, when ingested can cause health impacts to humans and animals. USGS will use reports entered in real time by respondents of ash fall in their local area to correct or refine ash fall forecasts as the ash cloud moves downwind. Retrospectively these reports will enable USGS to improve their ash fall models and further research into eruptive processes. This project is a database module and web interface allowing the public and Alaska Volcano Observatory (AVO) staff to enter reports of ash fall in their local area in real time and retrospectively following an eruptive event. Users browsing the AVO Web site during eruptions will be directed towards a web form allowing them to fill in ash fall information and submit the information to AVO.

Compiled ashfall reports are available in real-time to AVO staff through the AVO internal Web site. A pre-formatted summary report or table that distills information received online will show ash fall reports in chronological order with key fields including (1) date and time of ash fall, (2) location, (3) positive or negative ash fall (4) name of observer, and (5) contact information is easily viewable internally on the report so that calls for clarification can be made by AVO staff quickly and Operations room staff can visualize ashfall information quickly.

Ash fall report data will also be displayed on a dynamic map interface and show positive (yes ash) and
