SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. What should I consider as I prepare my comments for EPA?

1. **Submitting CBI.** Do not submit this information to EPA through regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI

information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for preparing your comments.** When preparing and submitting your comments, see the commenting tips at <http://www.epa.gov/dockets/comments.html>.

II. Registration Applications

EPA has received applications to register new uses for pesticide products containing currently registered active ingredients. Pursuant to the provisions of FIFRA section 3(c)(4) (7 U.S.C. 136a(c)(4)), EPA is hereby providing notice of receipt and opportunity to comment on these applications. Notice of receipt of these applications does not imply a decision by the Agency on these applications.

Abstract: The Natural Gas STAR Methane Challenge Program is a voluntary program sponsored by the U.S. Environmental Protection Agency (EPA) that provides an innovative voluntary mechanism through which oil and natural gas companies can make specific, ambitious commitments to reduce methane emissions. This Program is an integral part of the EPA’s ongoing commitment to address methane emissions and global climate change, and was developed through extensive stakeholder engagement and support from companies and trade organizations in the oil and gas industry. Methane is the primary component of natural gas and a potent greenhouse gas. The Program works to encourage oil and natural gas companies to go above and beyond existing regulatory action and make meaningful and transparent commitments to yield significant methane emissions reductions in a quick, flexible, cost-effective way. Transparency in comprehensively tracking company commitments through the non-confidential data reported by Methane Challenge partners is a key feature of the Program, and enables partners to highlight emissions reductions achieved through voluntary action taken. Implementation of the Methane Challenge Program’s two commitment options, the Best Management Practice Commitment and the ONE Future Emissions Intensity Commitment, improves operational efficiency, saves partner companies money, and enhances the protection of the environment.

Forms: Methane Challenge Program partners are required to sign and submit to EPA a Partnership Agreement (PA) that describes the terms of participation in the Program. The PA forms covered under this ICR include: Methane Challenge Program Partnership Agreement—Best Management Practice Commitment; and, Methane Challenge Program Partnership Agreement—ONE Future Commitment. Partners must complete and submit a Methane Challenge Implementation Plan within six months of signing the MOU. The Implementation Plan forms covered under this ICR include: Methane Challenge Program Implementation Plan Template—BMP Commitment; and, Methane Challenge Program Implementation Plan Template—ONE Future Commitment. After one full calendar year of participation in the Program, EPA requires partners to submit a specific set of data

documenting the previous year’s methane emissions, activity data, and reduction activities. The annual reporting forms covered under this ICR include: Best Management Practice Commitment Reporting Forms. The annual reporting forms for the ONE Future Commitment Option are to be developed but will follow the requirements set forth in the following document, available on the program website: Supplemental Technical Information for ONE Future Commitment Option. Upon becoming a partner in the Methane Challenge Program, companies are given an opportunity to draft and submit a Historical Actions Fact Sheet, which provides information on historical methane reduction actions taken prior to joining Methane Challenge. A two-page fact sheet template is made available to partner companies and allows entry of up to five key methane mitigation activities, including text, photos, and graphics. Submitting this document is *not* a requirement of the Methane Challenge Program partnership. The fact sheet covered under this ICR is: Historical Actions Fact Sheet Template.

Respondents/affected entities: The Natural Gas STAR Methane Challenge Program is open to companies in the oil production, and production, gathering and boosting, processing, transmission and storage, and distribution segments of the natural gas industry.

Respondent’s obligation to respond: Voluntary.

Estimated number of respondents: 58 (total projected partners over the three-year ICR period).

Frequency of response: Annual.

Total estimated annual burden: 2,978 hours. Burden is defined at 5 CFR 1320.03(b).

Total estimated annual cost: \$268,952, which includes \$0 annualized capital or operation & maintenance costs.

Courtney Kerwin,

Director, Regulatory Support Division.
