

support of this transfer is at the UNCLASSIFIED level.

g. The GAU-19 machine is a low-cost weapon system that is designed to accept standard NATO .50 caliber M9-linked ammunition with a rate of fire of 1300 rounds per minute. The weapon provides highly effective firepower against area suppression and point targets, as well as being ideally suited for utility, scout and attack helicopters. The highest level of information release in support of this transfer is at the UNCLASSIFIED level.

h. The Pathfinder Mission Management System (MMS) is a modular customizable system that provides command and control of onboard navigation, communication, and peripheral electronic equipment. During target engagements, locations and range to target is passed from Pathfinder to the weapons management system. The highest level of information release in support of this transfer is at the UNCLASSIFIED level.

i. The ARES Weapons Management System (WMS) is a modular weapons management system that uses the aircraft's EO/IR monitor as the WMS interface using a touchscreen graphical user interface (GUI). The system is fully integrated with the MX-15Di sensors critical EO/IR functions that can be controlled through the user interface. The system provides aircraft steering commands and targeting overlays to guide the pilot into the proper launch constraints by consolidating mission execution tasks. The highest level of information release in support of this transfer is at the UNCLASSIFIED level.

j. The Mission Configurable Armament System (MCAS) is a plank type weapons mounting system. The MCAS was developed as a lightweight, high strength, multi-purpose, multi-airframe weapons platform utilizing up to 6 weapon stations. The highest level of information release in support of this transfer is at the UNCLASSIFIED level.

k. The AN/ALE-47 is a software reprogrammable dispenser for chaff and flares. It provides for either automatic or aircrew commanded response dispense capabilities. Specific dispense routines are sensitive and are specifically withheld from Iraq. The export version uses a country unique "look-up decision tree" for determining dispense routines. This software when loaded into the AN/ALE-47 is classified CONFIDENTIAL. Increased risk of exploitation is significantly reduced given that the software is in executable form only (i.e. binary code) and the actual dispense routines can be gained through visual observation, which is true for all coalition platforms flying in Iraq.

2. If a technologically advanced adversary obtained knowledge of the specific hardware or software in the proposed sale, the information could be used to develop counter-measures which might reduce weapons system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. A determination has been made that the recipient government can provide substantially the same degree of protection for the technology being released as the U.S. Government. This sale supports the U.S. foreign policy and

national security objectives as outlined in the Policy Justification.

4. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Iraq.

POLICY JUSTIFICATION

United Kingdom—H-47 Chinook (Extended Range) Helicopters and Accessories

The Government of United Kingdom has requested a possible sale of sixteen (16) H-47 Chinook (Extended Range) helicopters; thirty-six (36) T-55-GA-714A engines (32 installed, 4 spares); forty-eight (48) embedded GPS inertial navigation units (32 installed, 16 spares); twenty (20) common missile warning systems (16 installed, 4 spares); twenty-two (22) radio-frequency countermeasures (16 installed, 6 spares); nineteen (19) multi-mode radars (16 installed, 3 spares); nineteen (19) electro-optical sensor systems (16 installed, 3 spares); forty (40) M-134D-T mini guns, plus mounts and tools (32 installed, 8 spares); and forty (40) M240H machine guns, plus mounts and tools (32 installed, 8 spares). This sale also includes communications equipment; navigation equipment; aircraft survivability equipment; initial training equipment and services; synthetic training equipment; support package including spares and repair parts; special tools and test equipment; aviation ground support equipment; safety and air worthiness certification; technical support; maintenance support; technical and aircrew publications;

mission planning system equipment and support; and, project management and governance; U.S. Government and contractor engineering and logistics support services; and other related elements of logistic and program support. Total estimated cost is \$3.5 billion.

The United Kingdom is a close NATO ally and an important partner on critical foreign policy and defense issues. The proposed sale will enhance U.S. foreign policy and national security objectives by enhancing the United Kingdom's capabilities to provide national defense and contribute to NATO and coalition operations.

The proposed sale will improve the United Kingdom's ability to meet current and future threats by providing a heavy lift rotary wing capability able to execute missions in extreme environments across a full range of military operations. The United Kingdom will have no difficulty absorbing these helicopters into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor of this sale will be Boeing Defense and Space, Ridley Park, PA.

There is no known offset agreement associated with this proposed sale.

Implementation of this proposed sale will require approximately 29–32 U.S. Government personnel and 26 contractors assigned to the United Kingdom plus 3 equivalent man years TDY to support fielding and initial sustainment for a duration of 3–5 years.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
