

- 3,000 local jail respondents will each submit an annual summary form, with an average response time of 15 minutes per annual summary form, for a total burden of 750 hours.

The 3,000 local jail respondents will be called to participate in the verification call (with an estimated reporting time of 8 minutes) prior to the start of the data collection. We expect that in any data collection year:

- 3,000 local jail respondents will have an average response time of 8 minutes per verification call, for a total burden of 400 hours.

Data quality follow-up occurs between May and July of each collection year and involves confirming, clarifying, or correcting data reported on the CJ-9/CJ-9A or CJ-10/CJ-10A forms submitted by the respondent. Not all local jail records submitted require data quality follow-up. An average of 900 local jail respondents require some level of follow-up annually, which averages about 15 minutes per respondent, for a total burden of 225 hours.

The total burden of hours associated with the local jail data collection is 1,925 hours, with an average burden of 39 minutes per year across the 3,000 local jail respondents. This is an increase in burden from the 2016 MCI-Jails clearance package (OMB control number 1121-0094), due to an increase in the number of deaths reported and in the number of local jail respondents who will need to be contacted for data quality follow-up, based on recent years' data collections.

Combined State Prison/Local Jail Burden estimate. The total burden estimate for MCI across all 3,050 state prisons and local jails is 3,823 hours per year.

Overview of This Information Collection

1. *Type of Information Collection:* New collection.

2. *Title of the Form/Collection:* Annual Survey of Jails in Indian Country (SJIC).

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* The form number is CJ-5B: *Survey of Jails in Indian Country (SJIC)*. This form is sent to approximately 84 confinement facilities, detention centers, and other correctional facilities operated by tribal authorities or the Bureau of Indian Affairs (BIA). The applicable component within the Department of Justice is the Bureau of Justice Statistics (BJS), in the Office of Justice Programs.

The Bureau of Justice Statistics (BJS) requests clearance to conduct the Survey of Jails in Indian Country (SJIC) for a three-year period and also requests a new unique clearance number for the SJIC data collection. The SJIC is currently approved through 1/31/2019 under OMB Control Number 1121-0094 along with the Annual Survey of Jails (ASJ), and until recently, the jail portion of the Mortality in Correctional Institutions (MCI-formerly the Deaths in Custody Reporting Program). Considering these data collections are unique in substance, collection period, and respondents, each collection has required enhancements at different periods of time. Consequently, BJS has revised the combined clearance multiple times over the past several years, and in some cases, BJS delayed enhancing a unique survey until all data collections could be addressed with a single revision. This process does not allow BJS to address the critical needs of a single collection in a timely manner. As a solution, BJS proposes to separate these collections and obtained a unique OMB clearance for each. The ASJ, when it is next fielded in 2020, will retain the OMB Control Number 1121-0094. The MCI-Jails collection will be combined with the MCI-Prison collection under OMB Control Number 1121-0249. The SJIC will obtain a new OMB Control Number through this application.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* The affected public that will be asked to respond to CJ-5B includes jail administrators from approximately 84 confinement facilities, detention centers, and other correctional facilities operated by tribal authorities or the Bureau of Indian Affairs. The respondents will be asked to provide information for the following categories:

(a) At midyear (last weekday in the month of June), the number of inmates confined in jail facilities including: Male and female adult and juvenile inmates; persons under age 18 held as adults; convicted and unconvicted males and females; persons held for a felony and a misdemeanor; the inmates most serious offense (i.e., domestic violence offense, aggravated or simple assault, rape, other violent, burglary, larceny-theft, drug law violation, DWI/DUI of alcohol or drugs, public intoxication, and other unspecified offenses);

(b) The average daily population during the 30-day period in June;

(c) The date and count for the greatest number of confined inmates during the 30-day period in June;

(d) The number of new admissions into jail, and final discharges from jail during the month of June;

(e) From July 1 of the previous year to June 30 of the current collection year: the number of inmate deaths while confined, the number of deaths attributed to suicide, and the number of confined inmates that attempted suicide;

(f) At midyear, the number of correctional staff employed by the facility and their occupation (e.g., administration, jail operations, educational staff, etc.);

(g) At midyear, the number of jail operations employees who had received the basic detention officer certification and how many had received 40 hours of in-service training; and

(h) At midyear, the total rated capacity of jail facilities.

This collection is the only national effort devoted to describing and understanding annual changes in the tribal jail population. The collection enables BJS, tribal correctional authorities and administrators, legislators, researchers, and jail planners to track growth in the number of jails and their capacities nationally, as well as to track changes in the demographics and supervision status of the tribal jail population and the prevalence of crowding.

5. *An estimate of the total number of respondents and the amount of time*
