

Enhanced Surface Water Treatment Rule (LT2ESWTR), the Ground Water Rule (GWR), and the Aircraft Drinking Water Rule (ADWR). Future microbial-related rulemakings will be added to this consolidated ICR after the regulations are promulgated and the initial, rule-specific ICRs are due to expire.

Form Numbers: None.

Respondents/affected entities: Public water systems and primacy agencies.

Respondent's obligation to respond: Mandatory for compliance with 40 CFR parts 141 and 142.

Estimated number of respondents: 146,808 (total).

Frequency of response: Varies by requirement (*i.e.*, on occasion, monthly, quarterly, semi-annually, and annually).

Total estimated burden: 18,127,581 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$972,102,000 (per year), includes \$228,972,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase of 3,443,983 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This is due to full implementation of the Revised Total Coliform Rule, as well as increased state burden associated with recordkeeping, compliance tracking, and significant deficiency and corrective action reporting for sanitary surveys at large surface water systems.

ICR status: This ICR is currently scheduled to expire on April 30, 2019. EPA did not receive any comments in response to a 60-day public comment

opportunity announced in the **Federal Register** on August 29, 2018 (83 FR 44045). Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. Under the PRA, 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number.

Abstract: EPA promulgated the generic Preliminary Assessment Information Rule (PAIR) (40 CFR part 712) under section 8(a) of the Toxic Substances Control Act (TSCA). The Frank R. Lautenberg Chemical Safety for the 21st Century Act amending TSCA was enacted on June 22, 2016; however, the authority for a TSCA section 8(a) PAIR rule was not modified. EPA uses PAIR, using the Manufacturer's Report Preliminary Assessment Information Form, to collect information to help identify, assess, and manage human health and environmental risks from chemical substances, mixtures and categories. PAIR requires chemical manufacturers and importers to complete and submit standardized information about production, use, or exposure-related data to help evaluate the potential for human health and environmental risks caused by the manufacture or importation of identified chemical substances, mixtures or categories. EPA or other federal agencies can identify chemicals for a TSCA section 8(a) PAIR expediated rulemaking that have a justifiable need for production, use, or exposure-related data. This ICR also covers certain specific chemical testing and reporting requirements under Subpart B of 40 CFR part 766 that are very similar to the PAIR requirements. The Agency rarely receives submissions of the information required by 40 CFR 766. The dibenzo-para-dioxin/dibenzofuran regulations at 40 CFR part 766 require that any person who manufactures, imports, or processes a chemical substance listed at 40 CFR 766.25 test that chemical substance and submit appropriate information to EPA. Persons who commence manufacture, import, or processing of a chemical substance listed at 40 CFR 766.25, must submit a letter of intent to test or an exemption application within 60-days of starting any of those activities. Each person who is manufacturing or processing a chemical listed in 40 CFR 766.25, must submit a protocol for testing. Persons who manufacture or import a chemical substance listed under 40 CFR 766.25 must report positive test results, using

the Dioxin/Furan Report Form, of all existing test data that show that chemical substance has been tested for the presence of halogenated dibenzodioxins/halogenated dibenzofurans (HDDs/HDFs), as well as any health and safety studies for the chemical substance, as defined in the regulation, no later than 90 days after the date of submission of the positive test result. Additionally, any manufacturer or importer of a chemical substance listed in 40 CFR 766.25 in possession of unpublished health and safety studies on HDDs/HDFs is required to submit copies of such studies to EPA, in accordance with provisions of 40 CFR 716, no later than 90 days after the person first manufactures or imports the chemical substance.

Form Numbers: EPA Form 7710–35, and EPA Form 7710–51.

Respondents/affected entities: Companies that manufacture, process or import chemical substances, mixtures or categories. Respondents are primarily in the following North American Industrial Classification System (NAICS) codes: 3251 Basic Chemical Manufacturing; 3252 Resin, Synthetic Rubber, and Artificial Synthetic Fibers and Filaments Manufacturing; 3255 Paint, Coating, and Adhesive Manufacturing; 3253 Pesticide, Fertilizer, and Other Agricultural Chemical Manufacturing; 3259 Other Chemical Product and Preparation Manufacturing; and 32411 Petroleum Refineries.

Respondent's obligation to respond: Mandatory (TSCA section 8(a) and 40 CFR 712).

Estimated number of respondents: 1 (total).

Frequency of response: On occasion.

Total estimated burden: 33 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,533 (per year), includes \$0 annualized capital or operation and maintenance costs.

Changes in the Estimates: There is a slight increase of 1 hour in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase reflects the revised CBI substantiation requirements in the 2016 amendments to TSCA.

Dated: April 22, 2019.

Director, Regulatory Support Division.
