

offering. Letters of interest should not include company proprietary information, and all components and capabilities must be commercially available. Components are listed in section 3 of the Critical Cybersecurity Hygiene: Patching the Enterprise Building Block (for reference, please see the link in the PROCESS section above) and include, but are not limited to:

- Personal computers (PCs) and mobile devices, including operating systems, firmware, and apps
- Unified endpoint management (UEM), enterprise mobility management (EMM), mobile device management (MDM), and mobile application management (MAM) solutions
- Firewalls and intrusion detection/protection systems
- Routers/switches
- Network-based storage
- Update sources
- Privilege access management (PAM) system and privileged access workstation
- Configuration management system
- Vulnerability management system
- On-premises datacenter and cloud infrastructure, including servers, virtual machine (VM) hosts, VMs, containers, apps, and firmware

Each responding organization's letter of interest should identify how their products address one or more of the following desired solution characteristics in section 2 of the Critical Cybersecurity Hygiene: Patching the Enterprise Building Block (for reference, please see the link in the PROCESS section above):

1. Free or commercial tools will be harnessed to enable inventory capabilities so that the assets in the form of firmware, operating systems, and applications across the environment can be discovered, identified, classified for different impact levels and then prioritized for the order of remediation.

2. Patches will be deployed on scheduled intervals as part of regular release cycles, as well as on demand upon active patching emergencies in crisis situations to endpoint firmware, OS, and applications hosted on-premises or in the cloud (*e.g.*, Infrastructure as a Service), as well as "network devices" like firewalls, Storage Area Network (SAN) devices, routers, network switches, and other network appliances.

3. A cloud delivery model will be used as the mechanism for patching, such as a mobile device or a "Windows as a Service (WaaS)" model with Windows operating systems, Apple Software Update, and mobile software updates for Android and iOS devices

provided by device manufacturers or mobile operators.

4. Vulnerabilities will be identified and categorized across the assets so that the appropriate patches can be deployed in a prioritized order for optimum effectiveness.

5. There will be implementation procedures for isolation methods in place for assets that cannot be easily patched such as legacy unsupported systems or systems with very high operational availability requirements.

6. There will be stringent security practices in place to safeguard the patch management systems and any associated components used to support the patch management activities.

Responding organizations need to understand and, in their letters of interest, commit to provide:

1. Access for all participants' project teams to component interfaces and the organization's experts necessary to make functional connections among security platform components.

2. Support for development and demonstration of the Critical Cybersecurity Hygiene: Patching the Enterprise Building Block in NCCoE facilities which will be conducted in a manner consistent with the following standards and guidance: FIPS 200, FIPS 201, SP 800-53, SP 800-40, SP 800-184 and NIST, *Framework for Improving Critical Infrastructure Cybersecurity*.

Additional details about the Critical Cybersecurity Hygiene: Patching the Enterprise Building Block are available at: <https://www.nccoe.nist.gov/sites/default/files/library/project-descriptions/ch-pe-project-description-draft.pdf>.

NIST cannot guarantee that all of the products proposed by respondents will be used in the demonstration. Each prospective participant will be expected to work collaboratively with NIST staff and other project participants under the terms of the consortium CRADA in the development of the Critical Cybersecurity Hygiene: Patching the Enterprise Building Block. Prospective participants' contribution to the collaborative effort will include assistance in establishing the necessary interface functionality, connection and set-up capabilities and procedures, demonstration harnesses, environmental and safety conditions for use, integrated platform user instructions, and demonstration plans and scripts necessary to demonstrate the desired capabilities. Each participant will train NIST personnel, as necessary, to operate its product in capability demonstrations. Following successful demonstrations, NIST will publish a description of the security platform and

its performance characteristics sufficient to permit other organizations to develop and deploy security platforms that meet the security objectives of the Critical Cybersecurity Hygiene: Patching the Enterprise Building Block. These descriptions will be public information.

Under the terms of the consortium CRADA, NIST will support development of interfaces among participants' products by providing IT infrastructure, laboratory facilities, office facilities, collaboration facilities, and staff support to component composition, security platform documentation, and demonstration activities.

The dates of the demonstration of the Critical Cybersecurity Hygiene: Patching the Enterprise Building Block capability will be announced on the NCCoE website at least two weeks in advance at <http://nccoe.nist.gov/>. The expected outcome of the demonstration is to improve enterprise patching practices for general IT systems as part of a crucial effort in maintaining a highly effective Critical Cybersecurity Hygiene within the enterprise. Participating organizations will gain from the knowledge that their products are interoperable with other participants' offerings.

For additional information on the NCCoE governance, business processes, and NCCoE operational structure, visit the NCCoE website <http://nccoe.nist.gov/>.

Kevin A. Kimball,
NIST Chief of Staff.

Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of public meetings.

SUMMARY: The Pacific Fishery Management Council (Pacific Council) and its advisory entities will hold public meetings.

DATES: The Pacific Council and its advisory entities will meet April 9-16, 2019. The Pacific Council meeting will begin on Thursday, April 11, 2019 at 9 a.m. Pacific Daylight Time (PDT),

reconvening at 8 a.m. each day through Monday, April 15, 2019. All meetings are open to the public, except a closed session will be held from 8 a.m. to 9 a.m., Thursday, April 11 to address litigation and personnel matters. The Pacific Council will meet as late as necessary each day to complete its scheduled business.

ADDRESSES: Meetings of the Pacific Council and its advisory entities will be held at the Doubletree by Hilton Sonoma, One Doubletree Drive, Rohnert Park, CA; telephone: (707) 584-5466.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220. Instructions for attending the meeting via live stream broadcast are given under **SUPPLEMENTARY INFORMATION**, below.

FOR FURTHER INFORMATION CONTACT: Mr. Chuck Tracy, Executive Director; telephone: (503) 820-2280 or (866) 806-7204 toll-free; or access the Pacific Council website, <http://www.pcouncil.org> for the current meeting location, proposed agenda, and meeting briefing materials.

SUPPLEMENTARY INFORMATION: The April meeting of the Pacific Council will be streamed live on the internet. The broadcasts begin initially at 9 a.m. PDT Thursday, April 11, 2019 and continue at 8 a.m. daily through Monday, April 15, 2019. Broadcasts end daily at 5 p.m. PDT or when business for the day is complete. Only the audio portion and presentations displayed on the screen at the Pacific Council meeting will be broadcast. The audio portion is listen-only; you will be unable to speak to the Pacific Council via the broadcast. To access the meeting online, please use the following link: <http://www.gotomeeting.com/online/webinar/join-webinar> and enter the April Webinar ID, 634-645-459, and your email address. You can attend the webinar online using a computer, tablet, or smart phone, using the GoToMeeting application. It is recommended that you use a computer headset to listen to the meeting, but you may use your telephone for the audio-only portion of the meeting. The audio portion may be attended using a telephone by dialing the toll number 1-562-247-8422 (not a toll-free number), audio access code 532-691-006, and entering the audio pin shown after joining the webinar.

The following items are on the Pacific Council agenda, but not necessarily in this order. Agenda items noted as "Final Action" refer to actions requiring the Council to transmit a proposed fishery management plan, proposed plan amendment, or proposed regulations to

the U.S. Secretary of Commerce, under Sections 304 or 305 of the Magnuson-Stevens Fishery Conservation and Management Act. Additional detail on agenda items, Council action, advisory entity meeting times, and meeting rooms are described in Agenda Item A.4, Proposed Council Meeting Agenda, and will be in the advance April 2019 briefing materials and posted on the Pacific Council website at www.pcouncil.org no later than Friday, March 22, 2019.
