DEFINITIONS

SEC. 2. (a) As used in this Act, unless otherwise provided or indicated by the context, the term the "Department" means the Department of Energy or any component thereof, including the Federal Energy Regulatory Commission. 42 USC 7101.

(b) As used in this Act (1) reference to "function" includes reference to any duty, obligation, power, authority, responsibility, right, privilege, and activity, or the plural thereof, as the case may be; and (2) reference to "perform", when used in relation to functions, includes the undertaking, fulfillment, or execution of any duty or obligation; and the exercise of power, authority, rights, and privileges.

(c) As used in this Act, "Federal lease" means an agreement which, for any consideration, including but not limited to, bonuses, rents, or royalties conferred and covenants to be observed, authorizes a person to explore for, or develop, or produce (or to do any or all of these) oil and gas, coal, oil shale, tar sands, and geothermal resources on lands or interests in lands under Federal jurisdiction.

TITLE I—DECLARATION OF FINDINGS AND PURPOSES

FINDINGS

SEC. 101. The Congress of the United States finds that— 42 USC 7111.

(1) the United States faces an increasing shortage of nonrenewable energy resources;

(2) this energy shortage and our increasing dependence on foreign energy supplies present a serious threat to the national security of the United States and to the health, safety and welfare of its citizens;

(3) a strong national energy program is needed to meet the present and future energy needs of the Nation consistent with overall national economic, environmental and social goals;

(4) responsibility for energy policy, regulation, and research, development and demonstration is fragmented in many departments and agencies and thus does not allow for the comprehensive, centralized focus necessary for effective coordination of energy supply and conservation programs; and

(5) formulation and implementation of a national energy program require the integration of major Federal energy functions into a single department in the executive branch.

PURPOSES

SEC. 102. The Congress therefore declares that the establishment of a Department of Energy is in the public interest and will promote the general welfare by assuring coordinated and effective administration of Federal energy policy and programs. It is the purpose of this Act— 42 USC 7112.

(1) to establish a Department of Energy in the executive branch;

(2) to achieve, through the Department, effective management of energy functions of the Federal Government, including consultation with the heads of other Federal departments and agencies in order to encourage them to establish and observe policies consistent with a coordinated energy policy, and to promote maximum possible energy conservation measures in connection with the activities within their respective jurisdictions;

(3) to provide for a mechanism through which a coordinated national energy policy can be formulated and implemented to deal with the short-, mid- and long-term energy problems of the Nation; and to develop plans and programs for dealing with domestic energy production and import shortages;

(4) to create and implement a comprehensive energy conservation strategy that will receive the highest priority in the national energy program;

(5) to carry out the planning, coordination, support, and management of a balanced and comprehensive energy research and development program, including—

(A) assessing the requirements for energy research and development;

(B) developing priorities necessary to meet those requirements;

(C) undertaking programs for the optimal development of the various forms of energy production and conservation; and

(D) disseminating information resulting from such programs, including disseminating information on the commercial feasibility and use of energy from fossil, nuclear, solar, geothermal, and other energy technologies;

(6) to place major emphasis on the development and commercial use of solar, geothermal, recycling and other technologies utilizing renewable energy resources;

(7) to continue and improve the effectiveness and objectivity of a central energy data collection and analysis program within the Department;

(8) to facilitate establishment of an effective strategy for distributing and allocating fuels in periods of short supply and to provide for the administration of a national energy supply reserve;

(9) to promote the interests of consumers through the provision of an adequate and reliable supply of energy at the lowest reasonable cost;

(10) to establish and implement through the Department, in coordination with the Secretaries of State, Treasury, and Defense, policies regarding international energy issues that have a direct impact on research, development, utilization, supply, and conservation of energy in the United States and to undertake activities involving the integration of domestic and foreign policy relating to energy, including provision of independent technical advice to the President on international negotiations involving energy resources, energy technologies, or nuclear weapons issues, except that the Secretary of State shall continue to exercise primary authority for the conduct of foreign policy relating to energy and nuclear nonproliferation, pursuant to policy guidelines established by the President;

(11) to provide for the cooperation of Federal, State, and local governments in the development and implementation of national energy policies and programs;

(12) to foster and assure competition among parties engaged in the supply of energy and fuels;

(13) to assure incorporation of national environmental protection goals in the formulation and implementation of energy programs, and to advance the goals of restoring, protecting, and enhancing environmental quality, and assuring public health and safety;

(14) to assure, to the maximum extent practicable, that the productive capacity of private enterprise shall be utilized in the development and achievement of the policies and purposes of this Act;

(15) to provide for, encourage, and assist public participation in the development and enforcement of national energy programs;

(16) to create an awareness of, and responsibility for, the fuel and energy needs of rural and urban residents as such needs pertain to home heating and cooling, transportation, agricultural production, electrical generation, conservation, and research and development;

(17) to foster insofar as possible the continued good health of the Nation's small business firms, public utility districts, municipal utilities, and private cooperatives involved in energy production, transportation, research, development, demonstration, marketing, and merchandising; and

(18) to provide for the administration of the functions of the Energy Research and Development Administration related to nuclear weapons and national security which are transferred to the Department by this Act.

RELATIONSHIP WITH STATES

SEC. 103. Whenever any proposed action by the Department conflicts with the energy plan of any State, the Department shall give due consideration to the needs of such State, and where practicable, shall attempt to resolve such conflict through consultations with appropriate State officials. Nothing in this Act shall affect the authority of any State over matters exclusively within its jurisdiction.
