AMENDMENTS

2020—Pub. L. 116–271 amended section generally. Prior to amendment, section required that no later than 2 years after March 30, 2009, and every 2 years thereafter, the Administrator was to prepare and the President acting through the Council was to approve and transmit to Congress a report on progress made in implementing this chapter.

§ 3607. Public-private use policy

The Council shall maintain a policy that defines processes for making decisions about the roles of the Federal Government, the States, regional coastal observing systems, the academic community, and the private sector in providing to end-user communities environmental information, products, technologies, and services related to the System. The Administrator shall ensure that the National Oceanic and Atmospheric Administration adheres to the decision making process developed by the Council regarding the roles of the Federal Government, the States, the regional coastal observing systems, the academic community, and the private sector in providing end-user communities environmental information, data products, technologies, and services related to the System.

§ 3611. Assessing and modeling named storms over coastal States

(a) Definitions

In this section:

(1) COASTAL Formula

The term “COASTAL Formula” has the meaning given the term in section 4057(a) of title 42.

(2) Coastal State

The term “coastal State” has the meaning given the term “coastal state” in section 1453 of title 16, except that the term shall not apply with respect to a State or territory that has an operational wind and flood loss allocation system.

(3) Coastal waters

The term “coastal waters” has the meaning given the term in such section.

(4) Covered data

The term “covered data” means, with respect to a named storm identified by the Administrator under subsection (b)(2)(A), empirical data that are—

(A) collected before, during, or after such storm; and

(B) necessary to determine magnitude and timing of wind speeds, rainfall, the barometric pressure, river flows, the extent, height, and timing of storm surge, topographic and bathymetric data, and other
