

(a) within 180 days of the date of this order [June 11, 2019], identify relevant regulations and guidance documents within their respective jurisdictions that can be streamlined to ensure that products of agricultural biotechnology are regulated in accordance with the policy set forth in section 3 of this order and take the steps appropriate and necessary to accomplish such streamlining; and

(b) use existing statutory authority, as appropriate, to exempt low-risk products of agricultural biotechnology from undue regulation.

SEC. 5. *Unified Biotechnology Web-based Platform.* To ensure that innovators can easily navigate the regulatory system for products of agricultural biotechnology, the Department of Agriculture, the Environmental Protection Agency, and the Food and Drug Administration (collectively, the “agencies”) shall, within 180 days of the date of this order, work together to design a plan to establish a web-based platform that contains and provides links to relevant United States Government regulatory information. This web-based platform shall allow developers of products of agricultural biotechnology to submit inquiries about a particular product and promptly receive from the agencies a single, coordinated response that provides, to the extent practicable, information and, when appropriate, informal guidance regarding the process that the developers must follow for Federal regulatory review. The web-based platform shall be funded by the Department of Agriculture, with the other agencies providing support, to the extent consistent with applicable law and within existing appropriations, through appropriate interagency agreements, including agreements under the Economy Act [act June 30, 1932, ch. 314, part II, 47 Stat. 399, see 31 U.S.C. 1535].

SEC. 6. *Review of Current Authorities, Regulations, and Guidance.* (a) Each of the agencies shall, as appropriate, conduct a review of its regulations and guidance that may apply to genome-edited-specialty-crop-plant products designed to have significant health, agricultural, or environmental benefits, in particular those that are likely to benefit rural communities significantly. Based on the findings of its review, each of the agencies shall take steps to update its regulations and guidance, as necessary and appropriate, to remove undue barriers that impede small, private United States developers, the United States Government, and academic institutions from bringing innovative and safe genome-edited-specialty-crop-plant products to the marketplace.

(b) Every 90 days after the date of this order, for a period of 2 years, each of the agencies shall provide an update regarding its progress in implementing section 6 of this order to the Director of the Office of Management and Budget, the Director of the Office of Science and Technology Policy, the Assistant to the President for Economic Policy, and the Assistant to the President for Domestic Policy.

SEC. 7. *Domestic Engagement Strategy.* (a) Within 180 days of the date of this order, the Secretary, in coordination with the Administrator, the Commissioner, and any other Administration officials that the Secretary deems appropriate, shall develop an action plan to facilitate engagement with consumers in order to build public confidence in, and acceptance of, the use of safe biotechnology in agriculture and the food system.

(b) In developing the plan described in subsection (a) of this section, the following shall be considered: supporting research and education on effective science communication; developing educational materials that integrate agricultural biotechnology into science education; creating consumer-facing web content; and developing other outreach materials that clearly communicate the demonstrated benefits of agricultural biotechnology, the safety record of the regulatory system, and how biotechnology can address agricultural challenges. The strategy shall take into account the ongoing work of the Agricultural Biotechnology Education and Outreach Initiative, which calls on the Food and Drug Administration to work with the Department of Agriculture to conduct public education and outreach

on agricultural biotechnology and food and animal-feed ingredients derived from such technology. The Secretary shall coordinate with State leaders in the fields of public health and agriculture as part of this strategy.

SEC. 8. *International Outreach.* Within 120 days of the date of this order, the Secretary and the Secretary of State (collectively, the “Secretaries”), in consultation with the United States Trade Representative, the Administrator, the Commissioner, and any other Administration officials that the Secretaries deem appropriate, shall develop an international communications and outreach strategy to facilitate engagement abroad with policymakers, consumers, industry, and other stakeholders. The goal of the strategy shall be to increase international acceptance of products of agricultural biotechnology in order to open and maintain markets for United States agricultural exports abroad.

SEC. 9. *International Trade Strategy.* Within 120 days of the date of this order, the United States Trade Representative, in consultation with the Secretaries and the Trade Policy Staff Committee, shall develop an international strategy to remove unjustified trade barriers and expand markets for products of agricultural biotechnology.

SEC. 10. *General Provisions.* (a) Nothing in this order shall be construed to impair or otherwise affect:

(i) the authority granted by law to an executive department, agency, or the head thereof; or

(ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.

(b) This order shall be implemented consistent with applicable law and subject to the availability of appropriations.

(c) This order is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.
